

Please do not approve the NAB's petition 04-160. Satellite radio has been usefull tool for information and is a enjoyable alternative to mainstream radio. Greed should not be a factor in what the people have the right to listen to. I feel this bill is souly based on the broadcasters hunger for more money. Consumers should have a choice. If the members of the NAB cannot produce quality programing, this should not be a matter for our govt. to waste it's resources on.
